Restaurant story drink machine recipes

Restaurant Story Constructible Appliance Guide by moratorroHOW EASY APPLIANCES WORK: First of all I want to say that I wrote this guide only with personal tests I did the last days. So there may be some bugs, or TeamLava can make updates so that the game rules change (as it actually happened with the last update on June 10th...) Ok, let's look at easy devices and how they work. First of all, they are easy, because they need only one tap to start cooking food, and one tap to serve them on the counters. In other words, just reduce the tapping time, but not the cooking time: it's still the same. You need to buy one of them (stove, oven or grill), and it will cost 10,000 coins. For example, you can buy an easy stove: After adding it you need to put it in the free space, like a normal device, and what you get will be a box with spare parts inside:With double tap this window will appear: You can see that it needs 20 parts to complete. You can ask for these parts for free to neighbors, or you can buy them with gems: each part will cost 2 gems, so it comes with a total of 40 gems. If you have parts from neighbors before buying an easy device, you will find them already inside, just like the paint above. If you tap Ask Friends, you'll get another window: you can select neighbors to request parts from them (I removed the names from the picture), and then tap Send. You can only ask one part to each neighbor once a day. When your neighbors accept your request, all parts will go straight into the box. But if your neighbors give you parts by pressing the Gift button, you'll get them in the News List, just like other food gifts. So you have to accept them, just like you do with food. When you have all the parts you need this window you should finally see (this is for the oven): So all you need is to tap the Build it button! and that's it! Here's a new, easy device! Now I'm going to draw your attention to some of the things I've learned by doing some tests by myself. - Food gifts and gifts parts are separate (except I'll explain later).- You can get up to 20 parts a day.- If you send a part to your neighbor (by tapping accept) you can't send him other parts until the next day. But after all, it can send you only one part request on that day.- A request for a part from neighbors will appear in the News list. Just click on Accept and the parts will be sent to them.- When you receive a part from your neighbors (not your request, but a real gift like food), you need to press Accept, just like food, and you will see this: You can find it by going to My Gifts from the main menu. That's not true: on my gift list you'll only find gift food, while the parts will go straight in the box you're building. - I'm that: gifting parts and parts asking is completely free, neither coins nor gems.- If you are not building an easy device and you will receive gift parts, you can accept accept These parts will wait somewhere until you actually get an easy device and you will find them already in the box. I said earlier that food gifts and gifts parts are separate It's true only for the parts that are actually required of neighbors. Let's make an example. Your friend Groupmagma (!) builds an easy oven and sends you a request for one gear. You click Accept, and the equipment will be sent to him and go straight in his easy oven. This part will not interfere with the normal gift for the day. In fact, you can still give it to him by pressing the Gift button, and you can give him another part (instead of food): the latter part will appear on his gift list along with other food gifts that Groupmagma received that day. This way you can give your neighbors two parts every day, even if it's a little tricky... I hope this post can help you. If you have other information or news about easy devices please add one post here so everyone can read it. Please add only messages that you have actually tested by yourself, not just things like Gifting Parts is a diminishing gem! (this is definitely not true). Thank you to all my amazing neighbors for their support and their parts and gifts! Enjoy! Edit: Some additional information. 1. When trying to purchase any of the equipment (including drinking machine), it helps to touch the upper part, away from the hammer. 2. After placing it, it is best to touch the very bottom of the box to access it. 3. When trying to access the cardboard after purchase, you may need to move it or items around it to access it. If you don't want it to sit alone all the time, just move it, access it to see how many parts or send requests, and then put it back where you want it to be. 4. Chef hats and exp are exactly the same as regular appliances, though they may seem different when you're tapping.misukume was kind enough to provide this chart, and also this chart, with holiday devices and now with valentines device Adding levels that devices unlock: Start - 2 Level 5 - 3 Level 10 - 4 Level 14 - 5 Level 19 - 6 Level 23 - 7 Level 28 - 8 Level 32 - 9 Level 37 - 10 Level 41 - 11 Level 46 - 12 Level 50 - 13 Level 55 - 14 Level 59 - 15 Level 64 - 16 Level 68 - 17 Level 73 - 18 The coffin drinking machine has three recipes and they look so cute! I love these little bottles. To see more Coffin Drink Machine Recipes (BS) Coffin Drink Machine is the new Halloween Edition device for Bakery Story. Introduces two new parts Read More Requirements for coffin drinking machine parts (BS) This is the main list of all recipes available for Restaurant Story. I will continue to add newer provisions to this table as they appear. Newer recipes will go upstairs.
